

HELP KEEP HIM HEALTHY THIS SPRING AND SAVE.

A spring exam will help protect your horse's health, comfort, performance and longevity. When we perform an exam on your horse before June 15, 2016, you'll receive a rebate coupon for \$5 when vaccinating with both WEST NILE-INNOVATOR® and FLUVAC INNOVATOR®, and receive an additional \$2 for deworming with QUEST® Gel or QUEST® PLUS Gel.

Unvaccinated horses have up to 30 times greater risk for West Nile.¹⁻³

Help to make sure the health of your horse is protected with WEST NILE-INNOVATOR, which has been shown to provide four times better immune response than the large one-dose combination West Nile vaccines.⁴ It's important to vaccinate your horse before mosquitoes, which transmit the virus, are at their peak.

Ensure your horse is prepared for the risks of travel.

Help protect your horse against newly emerging and conventional equine influenza virus (EIV) strains and equine herpesvirus (EHV-1 and EHV-4) with FLUVAC INNOVATOR, the most tested and trusted defense against equine influenza.^{5,6} Don't forget: United States Equestrian Federation (USEF) vaccination rules now require horses to be vaccinated against EIV and EHV within the six months prior to entering competition stables and owners to provide documentation.

Parasites can lead to weight loss, poor condition and colic.

American Association of Equine Practitioners (AAEP) parasite control guidelines suggest that not all horses need the traditional "one size fits all" rotational deworming. We can work with you to create an effective Individualized Deworming™ program for your horse.

IMPORTANT SAFETY INFORMATION: Do not use QUEST Gel or QUEST PLUS Gel in foals less than 6 months of age or in sick, debilitated and underweight horses. Do not use in other animal species, as severe adverse reactions, including fatalities in dogs, may result.
